About This Series The Aerospace Press is the publishing arm of The Aerospace Corporation. This independent, nonprofit corporation helps the U.S. Government plan, research, develop, acquire, and operate space, launch, and associated ground systems.

The Aerospace Press | AIAA Aerospace Research Central

The Xibaipo science popularization satellite is co-worked by the China Center for Aerospace Science and Technology International Communications and the No.1 Middle School of Luquan District, in Shijiazhuang City of north China's Hebei Province. The satellite is a 2U (about 10cm ×10cm × 20cm) cube satellite.

China successfully launches two new satellites - CGTN

The fourth report in The Aerospace Corporation's Center for Space Policy and Strategy (CSPS) Game Changer series, On-Orbit Servicing: Inspection, Repair, Refuel, Upgrade, and Assembly of Satellites in Space, explores new on-orbit servicing (OOS) capabilities and what this ground-breaking technology could mean for the future of satellite operation, including the potential cost savings of ...

Value of Servicing Satellites in Space | The Aerospace ...

Decades of space travel have resulted in a large amount of space debris that can be harmful to today's satellites. Aerospace is addressing the issue of space debris and space traffic management by developing tools for analyzing potential collisions, studying reentry breakups, and modeling debris objects in space.

Satellites and Orbits | The Aerospace Corporation

A communications satellite is an artificial satellite that relays and amplifies radio telecommunications signals via a transponder; it creates a communication channel between a source transmitter and a receiver at different locations on Earth. Communications satellites are used for television, telephone, radio, internet, and military applications. There are about 2,000 communications satellites ...

Communications satellite - Wikipedia

Derelict satellites, equipment and other debris orbiting Earth (aka space junk) have been accumulating for many decades and could damage or even possibly destroy satellites and human spacecraft if they collide. During the past 50 years, various National Aeronautics and ...
